

MASTER SCORE FOR BETTER PRESCRIPTION

Master Score is the ultimate tool to fine tune your prescribing results using RadarOpus software. It's particularly useful for cases that need a deeper study, because it gives meaningful insights at a single glance, saving time and preventing potentially significant omissions of candidate remedies.

KEY POINTS:

- ⊗ *Each remedy is evaluated according to the author's reference, which may be more or less reliable*
- ⊗ *The more a remedy is referenced the more points it earns (the more authors it has as a reference)*

- ⊗ *The method takes into account the intensity of the symptom*
- ⊗ *The calculation will show the remedies sorted according to the value "achieved" by each remedy*
- ⊗ *You need at least 5 symptoms for it to work*

HOW TO USE IT:

Master Score, when routinely used, will be helpful to understand repertorization more deeply, which – as Dr. Farokh Master says – *“has the potential to bring a new level of homeopathic practice and elevate the status of homeopathy around the world”*.

The beautiful part of the Master Score is that it filters out remedies which haven't undergone appropriate pathogenesis, in other words “cloned” remedies, (remedies that have never experienced an adequate investigation). So in a way, it is a suitable filter to have so we can be more specific when prescribing remedies.

With Master Score because you can clarify the remedy selection and drill down into the correct remedy by asking questions of Materia Medica, so when you're looking to see what questions to ask or what remedy you want to select you can quickly look at Materia Medica which of course is the final stage in making any prescription.

It is an Expert System in the sense that it evaluates the rubrics according to their importance.

Whenever you underline, it brings up different remedies, so you can really choose what symptoms are the most important to you, as well as the remedy which has marked these symptoms. This unique calculation system only exists in RadarOpus. Dr. Master says *"I use it successfully also when teaching, because it shows me the remedy I prescribed amongst the first results. It's easy to spot because it has the marked symptoms of the case, the characteristic symptoms and so on"*.

Main features

- Advanced expert system based on groundbreaking research in homeopathic prescribing
- Ask Materia Medica questions to patients using Master Score to confirm remedies
- Uses Synthesis Repertory, which is constantly updated
- Simple, intuitive graphical user interface
- Available in all 9 Synthesis languages
- Available for RadarOpus 3.3 users and later
- Export Master Score analysis to a file, print it or save the analysis
